

Frontier 5.99

Polycrafts Frontier 5.99 Centre console combines style, performance, safety and a workable layout that places it among the leaders in its class. An extensive list of standard features combined with positive buoyancy and awesome on water performance makes it hard to beat when choosing a boat for offshore boating and fishing.

Polycraft boats are manufactured from low density Polyethylene and have several advantages over Alloy and Fibreglass .

Flexibility: Hull flexes and absorbs wave impacts, creating a truly soft ride ensuring a more comfortable and enjoyable day on the water.

Low maintenance: Polyethylene is not effected by electrolysis or osmosis , never needs painting, is easy to clean and repair and is UV stable. More time on the water, less time maintaining your boat.

Strong and durable: Hulls are rotationally moulded creating a seamless one piece hull that has no weak points. Hull has an average thickness of 12mm and has an impact resistance five times greater than fibreglass.

Twin skin hull: Rotational moulding process creates a twin skin hull which has a cavity between the two skins. Hull is then injected with foam adding the benefit of positive buoyancy which not only gives piece of mind but also complies with proposed new Marine Safety Standards that commence in July 2005.

Polycraft offers all these benefits but at a price tag that wont break the bank, providing more boat for your bucks .

Specifications:

LENGTH BOW TO TRANSOM	5.99 metres
LENGTH OVERALL	6.10 metres
BOAT WEIGHT (hull only)	900kg
OVERALL WEIGHT (Hull, trailer, motor, 200 ltr of fuel)	1900kg
BEAM	2.5 metres
DEPTH	1.4 metres
INTERNAL GUNWALE HEIGHT	700mm
BOAT LENGTH ON TRAILER (Motor Down)	7.8 metres
BOAT HEIGHT ON TRAILER.....	2.6 metres
MATERIAL THICKNESS.....	average 12mm
TRANSOM SHAFT LENGTH.....	extra long (25 inch)
MAXIMUM HORSE POWER	175hp
MAXIMUM TRANSOM WEIGHT	225kg
NUMBER OF PEOPLE	6
HULL WARRANTY	4 years
